### **Our Team**

- We value each member of our team and maintain a climate of openness, while interacting on professional discussion.

### **Community Commitment**

- We live and work in a larger community. We support technical communities and professional societies.

Established in 2019, Hiju Steel Experts sourcing LLP is a company – created for offering services to upcoming and existing steel and allied industries and MSME sector through willing pool of experts from SAIL , TATA STEEL, Vizag Steel NTPC, COAL INDIA , Nuclear Power Corporation etc to name a few. The company provides experts to industries at the time of need and requirements and also offer consultancy services through pool of experts for operational issues, maintenance, marketing, product certification, ISO certifications etc. Our company also facilitate equipments suppliers for supply of equipments to the industry reference to modernization / up gradation of steel and allied industries.

We have more than 150 experts in our pool located near major steel plants of India as well as metro cities like Delhi , Kolkata , Mumbai , Chennai, Hyderabad, Bangalore, Chandigarh etc.

Our company has already working on **two projects** – one on assessing energy losses in one of the operational steel plant for its corrective action and also other one in a old multistoried building where a co-working office is going to start their operation shortly. These projects has been collaborated with a **startup company** who are manufacturing energy assessing equipments.

Our company also in dialogue with a **New Zealand** based company for establishing their market for equipment manufacturing light structural frames for light structural building.

**We are going to enter 2020 with a grand expectation of rapid industrial and infrastructural growth and looking forward for individuals to join with us for becoming a part of our challenging and winning team.**

### **HIJU STEEL EXPERTS SOURCING LLP**

#### **EX DGM STEEL AUTHORITY OF INDIA LIMITED**

Served more than 37 years in various areas of integrated steel plants/industry segment including marketing of steel and by-products of steel plants. As a steel man (worked in Steel Authority of India ltd), I have experienced that there is a scarcity of steel and heavy industry experts within the industry as well as in the market at the time of need. Keeping it in view of the same effort has been made to create a experts pool to facilitate existing and upcoming steel and allied industries including MSME sector. Hope this pool will be useful for ongoing and future upcoming industries, equipment suppliers and service providers.
